Washington's threats stick
Washington's threats do not stick
Washington's need, V
more need, V'
more need extends the line; it does not lift it
above zero the two lines coincide
$k - c$
Washington's squeeze room, $k - c$: one budget for every demand
Europe goes if Washington's need is V
Europe goes even if the need is V'
What Washington pays Europe (below zero: Europe's concessions)
$(c = k)$
Europe's walk-away value, $c - k$ (China's offer minus Washington's penalty)
